3. PROJECT GOALS:

The primary goal of this initiative is to strengthen the evidence base on the economic contribution of Indonesian migrant workers and to develop targeted policies that enhance their financial inclusion and resilience.

The specific objectives are as follows:

a. Understand behavioral patterns, including the needs and challenges, related to the use of remittances by Indonesian migrant workers and their families.
b. Conduct impact analyses of Indonesian migrant workers' remittances (e.g., through a Remittance Index) on household economic growth and development in their regions of origin.
c. Formulate policy recommendations to promote the optimal use of remittances to enhance the welfare of Indonesian migrant workers and their families.

The expected output of this initiative includes:

a. A research report
b. Remittance Impact Index that provides insights on the economic, social, and developmental impact of remittances at household, regional and national level.

4. KEY ACTIVITIES AND SCOPE OF WORK:

Remittances serve as a vital lifeline for millions of Indonesian migrant worker families, often used to meet essential needs such as food, healthcare, education, and access to clean water and sanitation. Importantly, remittances are also increasingly directed toward productive uses, such as starting or expanding micro and small enterprises (MSMEs), investing in agriculture, or other income-generating activities that support long-term financial security. Beyond household welfare, remittances also help increase the purchasing of communities, which stimulates local markets and creates multiplier effects for regional economies.

Despite their critical role, the measurement of remittances' broader economic and social impacts remains fragmented. Current approaches largely capture the volume of remittance flows but do not provide a holistic view of how these

funds enhance household resilience, strengthen local purchasing power, foster entrepreneurship, or contribute to community and regional growth.

To address this gap, the study will develop a Remittance Impact Index - a measurement framework designed to assess the economic, social, and developmental contributions of remittances at household, regional, and national levels. This will provide policymakers and stakeholders with an evidence-based tool to design more targeted interventions, allocate resources effectively, and track progress over time.

WWB and KP2MI will collaboratively work in the following areas:

a. Stakeholder consultations through key informant interviews (KIIs) and focus group discussions (FGDs) with KP2MI, OJK, Bank Indonesia, Ministry of Foreign Affairs, FSPs, and other relevant actors to capture perspectives on remittance use and its current impact measurement.
b. Literature reviews to map global practices and design the conceptual framework of the Index.
c. Indicator development, identifying and validating key variables that capture the impact of remittances on household welfare, job creation, financial inclusion, purchasing power, entrepreneurship/MSME growth, regional economic development, and social outcomes.
d. Data collection, drawing from administrative data, existing migrant/household survey datasets, third-party sources such as from financial service providers (FSPs), and primary data collection through survey.
e. Field research, exploring the benefits of remittances for migrant workers and their families, as well as identifying barriers and opportunities in access, usage, and trust in digital financial services.
f. Data analysis and index construction, applying both quantitative and qualitative methods to build a multi-dimensional measure of remittance impact.
g. Synthesis of findings, integrating quantitative and qualitative insights to develop a narrative on remittance impacts, key constraints, and opportunities.
h. Co-design process with key stakeholders, including financial service providers (FSPs), government agencies, regulators, and Civil Society

Organizations to validate findings, translate insights into actionable recommendations and practical design features that can strengthen digital remittance access, improve financial management, and enhance long-term financial inclusion.

i. Development of policy brief tailored for policymakers, regulators, industry stakeholders, and local communities.

j. A dissemination workshop or seminar to launch the Remittance Impact Index and identify pathways for integration into government, regulator, and industry programs.
